29 January 1979

MEMORANDUM FOR: Deputy Director, NFAC

SUBJECT : Request to Speak at SAIS,
Johns Hopkins University

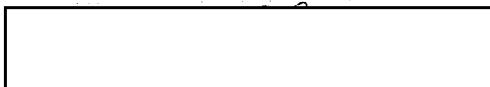

I request approval to speak the evening of 15 February 1979 at one of the two-hour sessions on the Chinese economy that is being offered at SAIS by Mr. James Lilley, former National Intelligence Officer for China. I would speak on Chinese use of historical analogy to debate current issues of national planning, military and economic priorities, reliance on foreign technology to modernize the economy, and so forth. I have researched and reported on such themes previously and the seminar would not interfere with my work in OSR. My presentation will be unclassified and will not take the form of a formal written paper, but will be extemporaneous from notes. I gave a similar talk at this seminar a year ago.
